PROFESSIONAL SUMMARY

Frontend Software Developer with 3+ years of experience delivering scalable, production-grade SaaS products across healthcare and EdTech domains. Specializes in React.js, TypeScript, and Redux, with a consistent track record of achieving 40% UI performance gains, reducing unauthorized access incidents by 60%, and driving end-to-end feature delivery from inception to production.

TECHNICAL SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript, Redux, Context API, Material UI, Styled Components, HTML5, CSS3

Backend & Tools: REST APIs, SQL, NoSQL, Spring Boot, Java, AWS (Rekognition, S3), Stripe, Firebase, Git, CI/CD, Figma, VS Code

Concepts: OOP, Data Structures & Algorithms, RBAC, Memoization, Lazy Loading, Performance Optimization, Component-Driven Development, Agile/Scrum, Unit Testing

PROFESSIONAL EXPERIENCE

Memorres Digital Private Limited

Software Developer

Jaipur, India

Jul 2024 – Present

- Led front-end development of **Student Wellbeing Hub** — a configurable SaaS platform empowering schools with a digital ecosystem for student wellbeing tracking, intervention follow-ups, and timely escalations.
- Spearheaded the greenfield front-end implementation of **Measurely** (Australian healthcare SaaS) through to production deployment — architecting reusable custom React hooks, code-split lazy-loaded components, and a scalable UI component library.
- Integrated **Stripe** payment gateway to support tiered subscription billing across multiple user plans. Engineered a **Role-Based Access Control (RBAC)** system that reduced unauthorized access incidents by **60%** and streamlined UI navigation across distinct user roles.
- Architected and optimized the **Savvy Health** platform (Ireland) using React, TypeScript, Redux, and Styled Components — achieving a **40% improvement in UI rendering performance** through targeted refactoring and component-level optimizations.
- Designed dynamic patient assessment forms with fully customizable clinical workflows; eliminated re-render overhead via **memoization and useCallback**, and reduced codebase redundancy by **55%** through strategic REST API consolidation.

Evolphin Software

Associate Software Developer

Gurugram, India

Feb 2023 – Jun 2024

- Integrated **AWS Rekognition** to enable AI-powered, real-time object detection across video assets stored in S3, enabling automated metadata tagging and significantly reducing manual content review effort.
- Revamped the **AI Dashboard** by restructuring the component architecture and delivering new feature modules using React and JavaScript, aligned with evolving product requirements and stakeholder feedback.
- Enhanced the **Login Management System (LMS)** to support hybrid workforce attendance — including remote punch-ins and in-office monitoring — using Java, SQL, and Spring Boot, boosting overall attendance process productivity by **15%**.
- Instituted weekly cross-functional bug triage meetings, driving resolution of **85%** of customer-reported tickets within SLA targets and contributing to a **20% improvement in customer retention**.

ACHIEVEMENTS

Covi-Hack Hackathon (All India) — Secured 3rd Place nationally; built a Financial Assistance and Crowdfunding App using React Native and Firebase, in partnership with local NGOs to support underprivileged communities.

Hack DSC Hackathon (VIT Bhopal) — Awarded a certificate of participation for designing an innovative, next-generation cinema website experience using Figma.

EDUCATION

Dronacharya College of Engineering

B.E. in Computer Science | GPA: 8.1 / 10.0

Gurugram, India

2019 – 2023
